For Weak Women

In use for over 40 years! Thousands of voluntary letters from women, telling of the good Cardui has done them. This is the best proof of the value of Cardui. It proves that Cardui is a good medicine for women.

There are no harmful or habit-forming drugs in Cardui. It is composed only of mild, medicinal ingredients, with no bad after-effects.

TAKE

CARDUI

The Woman's Tonic

You can rely on Cardui. Surely it will do for you what it has done for so many thousands of other women! It should help, "I was taken sick, seemed to be . . ." writes Mrs. Mary E. Veste, of Madison Heights, Va. "I got down so weak, could hardly walk . . . just staggered around. . . I read of Cardui, and after taking one bottle, or before taking quite all, I felt much better. I took 3 or 4 bottles at that time, and was able to do my work. I take it in the spring when run-down. I had no apr. life, and I commenced eating. It is the best tonic I ever saw." Try Cardui.

RECRUITING PARTY COMING

Opportunity will come into Clovis Friday in a big army touring car, the same being a recruiting party from Fort Bliss, Texas, which is to remain in Clovis for several days on recruiting duty. All the information on the new army plans that make the military service a big school for educating young men for a useful civilian life, in addition to making him physically fit and showing him the world, will be ready for the young men of this vicinity who think they might like to get into this big new travel and teaching institute that is called United States Army. Lt. William R. Schaefer of the 82nd Field Artillery, and the men with him, will have a good line to tell on the service overseas, on the border and in the army as an educational opportunity.

The soldier who joins nowadays has a big advantage in choosing his branch of the service and the country in which he prefers to serve. Clovis ought to drop in and look the party over.

COUNCIL OF DEFENSE GIVES REMEDIES FOR HIGH COST OF LIVING

Washington, Oct. 6.—After an investigation of the high cost of living problem, the council of national defense finds:

That the nation's productive powers have not been fully utilized since the armistice.

That too few goods, notably the necessities of life, have been produced and that even some of these goods have been withheld from the market, and therefore from the people.

That the high cost of living is due in part to unavoidable war waste and increase of money credit.

That there has been and is considerable profiteering, intentional and unintentional.

The council believes that the remedies for the situation are:

To produce more goods, and to produce them in proportion to the needs of the people.

To stamp out profiteering and stop unnecessary hoarding.

To enforce vigorously present laws and promptly to enact such further laws as are necessary to prevent and punish profiteering and needless hoarding.

To bring about better co-operation and methods in distributing and marketing goods.

To keep both producer and consumer fully informed as to what goods are needed and as to what supplies are available, so that production may anticipate the country's demands.

The council is composed of Secretaries Baker, Daniels, Lane, Houston, Redfield, and Wilson and Grover B. Clarkson as directors.

ONE-FIFTH OF SERBIA'S POPULATION PERISHED AS RESULT OF THE WAR

Belgrade, Oct. 5.—One-fifth of the population of Serbia, or about 800,000 persons, perished from all causes during the war. Typhus alone figures about 300,000 of these. No figures have yet been furnished by the Serbian war department as to the number of deaths in the army. It is known that the total number of men mobilized was 700,000. Of this number 300,000 were combatant troops and 400,000 were used in various auxiliary services. About 100,000 Serbians were interned in Bulgaria during the war, and of these about one-half are believed to have perished according to the reports of the inter-allied commission.

BIRTH AND DEATH REGULATIONS

The regulations recently passed by the State Board of Health for the registration of births and deaths, and the disposal of the dead, are now in effect. Blank forms and instructions have been placed in the hands of the local health officers, from whom they may be obtained by the public.

The salient points of the regulations are as follows:

Deaths—From now on, no dead body shall be buried or otherwise disposed of unless a permit therefor has been issued by the local health officer or his representative.

To obtain this permit, a death certificate must first be filed with the local health officer by the undertaker or person in charge of the body, which certificate must be made upon the form supplied by the State Commissioner of Health through the local health officers, and must give all the facts as to the death, the cause of death being stated by the attending physician, if there was one, and if not, by the health officer, justice of the peace or other proper official acting as coroner.

Births—Births must be registered with the local health officer or his representative within ten days by the physician or midwife, and if there be neither, then by the parent, upon the form supplied by the State Commissioner of Health through the local health officer.

Stillbirths must be registered both as births and deaths, and burial permits must be obtained.

The local health officer must make and retain a copy of each birth and death certificate, and on the tenth of each month must forward all original birth and death certificates to the State Commissioner of Health, who will permanently bind, index and preserve these records. The permanent local record will be filed with the city county clerk.

Also it may get so some time that the lagging schoolboy will demand time and a half for overtime.
